DETAILED ACTION

Drawings

1. The drawings are objected to because Figs. 1 and 2 are noted prior art figures and should be labeled accordingly. Correction is required.

Double Patenting

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

3. Claims 1-12 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-14 of copending Application No. 09/642553 in view of Cosman (U.S. Patent 5,748,703). Cosman teaches a method of radiation delivery comprising the steps of positioning a multi-leaf collimator between a radiation source and the treatment area to shape the beam, defining the treatment area. Cosman also teaches moving the collimator through an arc (see Fig. 1 – Prior Art) over the treatment area. Cosman discloses a system and method of radiation delivery configured to rotate the multi-leaf collimator about a central axis (i.e. Fig. 6) extending generally perpendicular to a plane such that the leaves define a multitude of treatment fields (see also Figs. 5 and 7).

This is a provisional obviousness-type double patenting rejection.
